Education

Bachelor of Technology (B.TECH) in Computer Science

Expected Graduation: 2027

JD College of Engineering and Management, Nagpur

Relevant Coursework: Database Management Systems (DBMS), Machine Learning, Data Science, Data Warehousing, Embedded Systems, Real-Time Operating Systems (RTOS)

Certifications:

- Machine Learning – NPTEL
- Modern C++ – NPTEL
- Data Science for Engineers – NPTEL
- FPGA for Beginners – e-Yantra, IIT Bombay (2025)
- IoT – NPTEL
- DBMS – IIT Kharagpur NPTEL
- Java – Apna College
- Full Stack Development – Apna College

Professional Experience

AI Deployment & Automation Intern

Dec 2025 – Mar 2026

EduSkills Foundation

- Developed, optimized, and automated AI-driven workflows and deployment pipelines.
- Worked with automation tools to streamline system integrations and improve deployment efficiency.
- Successfully completed a 10-week intensive internship program with official certification.

Technical Skills

Languages: Java, Python, C++, SQL, HTML, CSS, JavaScript (JSX)

Frameworks & Libraries: Python Flask, PySide6, PEFT Library

Databases & Tools: MySQL, SQL Server, Git, GitHub

Specialized Fields: AI Image/Video Generation, Augmented Reality (AR), Embedded Systems

Projects

SafeHer – Women's Safety System

Feb 2026

Python, Backend APIs, Git

- Developed a real-time women's safety backend infrastructure.
- Built secure and low-latency API endpoints for communication.
- Created structured technical documentation for collaborative development.

AR-Based Shoe Measurement & Customization App

Dec 2025 – Jan 2026

React/JSX, HTML/CSS, Computer Vision

- Developed an augmented reality interface for accurate foot measurement using device cameras.

- Integrated computer vision logic with a responsive front-end UI.
- Enabled real-time shoe customization and visualization features.

Expense Tracker Application

Oct 2025

Python, PySide6, SQL/DBMS

- Created a cross-platform desktop expense management application.
- Implemented optimized SQL database operations using DDL and DML commands.
- Added real-time budget forecasting and automated expense categorization.

FinoSafe

Finance Management Project

- Developed a finance-focused application for secure expense and budget management.
- Designed structured workflows for efficient financial tracking and reporting.

Achievements & Co-Curriculars

- National Competition Finalist – Advanced rounds selection at IIT Kharagpur (Jan 2026).
- Hackathon Competitor – Led technical stack planning for a 5-member team (Feb 2026).
- Participated in CII Industry Academia Conclave 2.0 at St. Vincent Pallotti College of Engineering (Jul 2025).

Languages

- English – Professional
- Hindi – Native/Fluent
- French – Elementary Learner
